Circular
Classes Nursery-XII

27 September 2025

Dear Parents,

"The beautiful thing about learning is that no one can take it away from you." — B.B. King

We are delighted to share some recent highlights and significant achievements of our students and the school community. This academic year has been filled with moments of great pride, showcasing the dedication of our students and teachers.

We are honored to announce that Tagore International School, East of Kailash, has been awarded the '**Excellence in Education**' award by **Brainfeed**. This recognition is a testament of our commitment to providing a dynamic and enriching learning environment.

In a remarkable initiative, our students from Grades III to V partnered with **Upschool** for a conservation project focused on protecting the endangered **Gangetic Dolphins**. We are proud to share that our school was one of the few to be featured in the book '*Raising Resilient Children*' - by Gavin McCormack, which is available for purchase on Amazon, highlighting this inspiring endeavor.

We are equally excited to provide you with an update on the progress of the infrastructure and academic programs we announced at the beginning of the academic year.

Infrastructure Upgrades Completed

- **New furniture** has been installed in Classes IV, V, and VII, creating more organised, comfortable, and student-friendly classrooms.
- **Air-conditioning systems** are now fully functional in the Nursery classrooms as well as in the Physics and Chemistry labs, ensuring a comfortable learning environment throughout the year.
- The **Robotics Lab** has been upgraded with cutting-edge infrastructure and the latest software, greatly enriching students' hands-on learning experience.
- Construction of **three additional activity rooms** has been completed, providing dedicated spaces for creative expression and collaborative learning.
- We have also introduced a **Pickleball Court** and a **Wall Climbing Station**, both of which have already become student favourites, promoting physical fitness, strategic thinking, and motor coordination.
- To foster artistic talents, we have brought in a range of **new musical instruments**.
- We have upgraded our gymnastics program with a **new gymnastics beam and crash mats**.

Academic & Enrichment Programs – Student Feedback & Progress

Our students have enthusiastically embraced the new educational programs introduced this year:

- **Think Right Program (Nursery – Class I):** Students are thoroughly enjoying the structured yet playful approach to learning how to think critically. Early feedback from both parents and teachers highlights noticeable improvement in students' logical reasoning and problem-solving abilities.
- **SHIN Japanese Mathematics (Classes II – IV):** The SHIN program has added a refreshing and engaging layer to our Mathematics curriculum. Students are responding positively to its activity-based methodology, and we are already seeing greater confidence in their approach to problem-solving.
- **Robotics (from Class V):** With the guidance of our expert robotics educator, students are excited to explore the world of technology and innovation. Practical sessions and project work have sparked curiosity and enthusiasm, with many students expressing aspirations to delve deeper into STEM fields.
- **Project-Based Learning (Classes VI–VIII):** Under the mentorship of an external expert, this initiative helps students connect classroom knowledge with real-world applications. Teachers have found this approach to be incredibly effective in deepening students' understanding, and they are showing improved collaboration and communication skills.

- **Skill Subjects (Class IX):** The addition of skill-based subjects has provided students with more opportunities to explore their interests, while also contributing positively to their academic performance and board exam readiness.
- **Personalised Career Counselling (Classes XI – XII):** Weekly sessions on Wednesdays and Thursdays have been well-received by students and parents alike. These sessions, focusing on education opportunities both in India and abroad, are helping students make informed decisions about their academic future.
- To support our senior students in their board examinations, our experienced faculty has compiled detailed **study materials**. These resources include organised notes, practice questions and sample papers, providing a reliable and structured resource to help every student perform to their highest potential.

Adobe Express Subscription for All Students

We are also delighted to announce that in addition to the availability of **Canva Pro**, **all our students now have access to Adobe Express**, a leading platform for creativity and digital storytelling. This tool empowers students to express their ideas visually through presentations, posters, videos, and more—skills essential in today's world of communication.

These developments are more than just enhancements; they are part of our ongoing effort to prepare your child for the future—with the right environment, tools, and guidance to thrive academically, socially, and emotionally.

We sincerely thank you for your continued trust and support. We are proud of the way our students have responded to these initiatives, and we are committed to building further on this foundation in the months ahead.

Warm regards

MALLIKA PREMAN
