CIRCULAR: CLASSES NUR to XII

23 September 2026

Dear Parents,

We are delighted to share that the academic session has been progressing wonderfully, with our students continuing to make us proud through their achievements in academics, leadership, sports, co-curricular activities and community engagement. From state-level championships to district-level events and inter-school competitions, our students have consistently brought home accolades.

These collective accomplishments have contributed to the school being ranked **among the Top 10 Schools of Delhi in the IIRF School Ranking**. We are also proud to share that the school was ranked **No. 1 in New Delhi for Parental Involvement** by **Education Today** and received the **ICOSA School Award 2026 for Best Learning Outcomes**.

Adding to these honours, the school's Principal, **Ms Mallika Preman**, was conferred with the prestigious **Lifetime Achievement Award by Rotary District 3011**.

Each of these recognitions reflects the collective efforts of our students, teachers and parents. We sincerely thank you for your continued trust, involvement and support in making the school a vibrant and enriching place of learning.

Strengthening Our Infrastructure

Alongside our academic and co-curricular initiatives, we have continued to invest in improving the school environment and facilities for our students. Some of the infrastructure enhancements undertaken this year include:

1. **Air-conditioning of all KG and Class I classrooms**, without any additional charge to parents.
2. Construction of **new and spacious sports rooms** for better storage and organisation of sports equipment.
3. Development of a **state-of-the-art, more spacious conference room**, equipped with upgraded facilities for **video conferencing, presentations and meetings**.
4. Installation of a **new shade outside the cafeteria** for greater comfort and convenience.
5. Creation of **additional space near the school gate** to facilitate smoother and safer movement of students during arrival and dispersal.
6. Installation of **additional CCTV cameras** to ensure more comprehensive surveillance and coverage across the school campus.
7. Installation of **GPS systems in school buses**, again without any additional charge to parents.
8. Upgradation of Robotics lab with advanced robotics kit, drones, cameras and Arduino kits to enhance hands on learning.

Looking Ahead

As the academic session progresses, there is much more for our students and families to look forward to.

Our Junior School students will come together for a joyful celebration of sports and togetherness at the **Junior Athletic Meet on Thursday, 15 October 2026**. A detailed schedule will be shared by the respective Class Teachers closer to the event.

Our much-awaited **Biennial Production** based on the theme '**This is me! Exciting Exploration of Dance, Drama and Music**', is scheduled for **Friday, 04 December and Saturday, 05 December 2026**. The production will be directed by Mr. Stephen Marazzi, a renowned theatre artist, and will provide our students with an exciting opportunity to experience theatre, music, dance and performance on a grand scale.

Invites and passes for these events will be shared closer to the date of the event.

To support the organisation and production requirements of the **Biennial Production and the Junior Athletic Meet**, a token contribution of **₹300 per month** will be added to the school fee for **October, November and December 2026**. We remain committed to providing our students with enriching experiences that extend beyond the classroom and contribute to their confidence, creativity, teamwork and holistic development.

We look forward to your continued support and enthusiastic participation in the exciting months ahead.

Warm regards

MALLIKA PREMAN
